

Facilities & Fixed Assets Management

From bus benches to station signage, Trapeze EAM has you covered.

Well-maintained facilities and equipment are essential to keep your riders safe and satisfied. With the FTA's TAM 'Final Rule,' it's critical to track the condition of your facility and stationary assets and report on them accurately. Whether it's ensuring on-time inspections or deciding which facilities have reached the end of their useful life, EAM helps you keep these assets in a state of good repair (SGR).

Tailor Made for Transit

We understand the daily challenge of managing facilities spread across a wide service area. By combining mobile and SGR solutions with transit-specific workflow automations, EAM makes it easier to perform day-day maintenance tasks.

Many of our departments are utilizing the system on a daily basis to record the work that's performed for our assets including fleet buses, paratransit, facilities departments, all our buildings and everything in them. It has become a very important tool for our entire agency."

- Theresa Rand, Senior System Administrator for EAM, RTC Las Vegas

Top 3 Reasons

Single Source of Truth

- Manage all facility assets (those maintained by your staff or third-party partners) in one system
- Consolidate data and automate workflows to improve efficiency and reporting accuracy
- Ensure compliance with TAM requirements and easily report to FTA with our standard NTD reports

Resolve Issues Before They Happen

- Proactively fix issues before they arise by integrating faults from your 'smart' facilities equipment into EAM to generate service requests and alert maintenance staff
- Avoid costly facility closures

Safety and Security

- EAM's inspection scheduler and work routing will help you ensure clean, well-lit stations, clear safety signage, and fully-operational security technology (cameras, emergency phones) for your riders
- EAM ensures your facilities are easily accessible for all. Your team assures this via a good design with fully operational ramps, elevators, escalators, and signage.
