

Illustrated Parts Catalog

Search and request. All in one system.

The Trapeze Illustrated Parts Catalog (IPC) gives your supervisors, technicians, and storekeepers easy access to electronic part schematics and technical documentation directly within EAM. From the EAM work order screen, click the IPC button to connect to the correct online parts catalog for the equipment you're working on. You can drill into the part assembly diagrams, click on the items you need, and request them from the parts room.

Tailor Made for Transit

EAM's IPC module radically improves shop efficiencies by replacing the cumbersome process of flipping through paper manuals with powerful searching in the full catalog.

“**Management was really pleased with the level of automation. Every asset, every bit of documentation for it and the IPC — everything was at our fingertips.**”

- Sue Altshuler, Senior Associate. ACI
ACI operates and maintains RTD Denver's A-Line service

Top 3 Reasons

Streamline & Simplify

- Easy access to all manuals and catalogs from within EAM
- Launch from a work order with a single click
- Request work order parts directly from the illustrated catalog
- Eliminate the errors and inefficiencies associated with manual part searches

More Informed Decision Making

- View parts in context in equipment diagrams to help eliminate component misidentification
- See the current quantity on hand in the storeroom within the catalog
- Search across catalogs to make strategic purchasing decisions

Uploading Documents is as Easy as 1-2-3

- Import new assembly diagrams and parts lists
- Automatic Hotspot: validate the automatic connection between the parts list and the diagram
