Workforce Management OPS-MON

Your key to seamless data management.

OPS-MON is a powerful data retrieval interface that helps you manage and utilize critical information from your OPS software. OPS-MON retrieves assignments, employee, and vehicle information from OPS for third-party systems, organizing and separating the data for easy and consistent external consumption. OPS-MON provides comprehensive listings of employee, vehicle, and work assignments defined in the system, updated in real-time by triggers from various system events.

Supercharge your operations with real-time updates, streamlined data management, and automation. Support better decision-making through consistent, up to date data and simplified access. Maximize safety and efficiency with precise, actionable insights that minimize errors and enhance passenger safety.

Get Quick and Easy Access to Important Data

Work Assignments Listings

- **Daily Block Assignments.** Create daily block assignments (with or without vehicle or employee assignments) using Activate Day or Build Blocks processes.
