

Trapeze Collaborate

Share. Listen. Learn. Together, We Can Do More.

Utilize the power of community to grow alongside your trusted peers. Collaborate is your space to connect with industry professionals, leverage our collective wisdom to solve problems, and share best practices.

Take part in special, product communities to enhance your knowledge, share learning, and build lasting relationships. Become a Collaborate member and transform your service to meet your riders' changing needs.

Grow and Innovate Together

- Be part of a highly engaged community committed to transit innovation. Collaborate is an exclusive platform for Trapeze customers to connect with your peers and our consultants, trainers, implementation, and support teams
- Your transit technology resources, all in one place. Gain access to a comprehensive library of product information and materials to help you address pain points and make the most of your Trapeze software
- A supportive environment for continuous learning. Tap into your peers' invaluable knowledge, share experiences and best practices to build better transit for today and tomorrow

Join Our Events and Webinars

- Meet and get to know us better. View upcoming industry events where Trapeze will be and find out what hot industry topic we are discussing on our Events page
- Learn about upcoming customer training webinars hosted by our Customer Care and Product teams on the Collaborate Events page

Community: Take Advantage of Specialized Knowledge

- Build up your transit know-how in special, product-specific communities of expertise
- Get the latest information on products, technology, and industry developments. Our extensive resource library contains updated reference guides, documentation, audio, and video support for your Trapeze products
- Participate in discussion boards where product experts and your peers come together to solve problems, get honest feedback, and share how they use the same solutions in different ways
- Discuss anything transit in our breakroom community – brainstorm, or relax and connect with your peers

Get Technical Support

- Quickly reach out to our development engineers and customer care team for any questions or concerns through our Incident Management Portal
- Log and track service requests with our 24/7 technical assistance
